Powercom Notes from Chay Bowar

BACK UP GENERATORS

With storms happening there is a greater chance for power outages; you may want to look into installing a standby generator. Make sure

you're covered for your next power outage. Call Powercom if you're in the market for a backup standby generator to save you from the next blizzard, rain storm, or random outage event!

WHOLE HOUSE SURGE PROTECTORS

Speaking of storms, this time of year, lightning can do some serious damage to home appliances and electronics. Did you know that Powercom can install whole house Surge protectors? A whole-house suppressor instantly blocks the surge from entering home circuits to provide comprehensive lightning protection.

LIGHTING UPGRADE PROGRAM

On a "lighter" note, did you know that there is grant/ loan information for any rural small business or ag producer interested in updating to energy efficient LED lighting? Business or ag producers in rural areas, with populations of less than 50000 people, are eligible to participate in USDA's Rural Energy for America program. This program provides grants up to 25% or loans up to 75% toward the total upgrading costs. If this fits you and are interested in updating to energy efficient lighting let Powercom know.

Or maybe you are interested in just changing some of your lights to LED or adding a occupancy/ motion detector to replace the light switch,?Powercom has the know-how for all of your electrical needs!

Remember, Powercom's office in Chamberlain is now located in the Chamberlain NAPA building. You can always contact us by calling 234-0528. In the Kennebec or Presho area and beyond, call 869-2150.
